Index of Articles for 1971

This Index lists all of the feature technical articles, surveys, and directories that appeared in EID during 1971. These have been grouped into thirteen categories, according to subject matter. Notice that many articles are listed two or more times, because they deal with subjects that are described by more than one of the thirteen categories. Names of the authors of all bylined articles are presented in italics—without reference to company affiliation. When no author is named, the article was written by the EID staff. Each entry identifies the 1971 issue in which the article appeared, and also the first page of the article.

Applying Computers to Instrumentation Systems

"Computer-Assisted Standards Laboratory", by *Everleigh W. Foster;* August, page 23.
"Computer Evaluation of Transfer Functions", by *B. James Ley;* September, page 24.
"Data Terminals for Instrumentation"; March, page 7.
"Digital Computers & Peripherals for Instrumentation— A Directory"; June, page 13.
"A Digitally Controlled Analog Phase Source", by *Don R. Tait;* May, page 47.
"Electromagnetic Pollution Measurement", by *H. Dean McKay;* December, page 14.
"Solving the Digital-Machine Interface Problem", by *Frank Kasper, Jr.* and *Philip Schaten;* August, page 20.

Automated Test Systems & Components

"Automated Test Instrumentation . . . A State-of-the Art Survey"; May, page 7.
"The Automation of Data Acquisition . . . Systems & Transducers", by *Dennis McCoskrie;* August, page 5.
"Data Terminals for Instrumentation"; March, page 7
"A Digitally Controlled Analog Phase Source", by *Don R. Tait;* May, page 47.
"Evaluation & Selection of Bench-Top Digital IC Testers", by *Sidney G. Freshour;* July, page 5.
"Logic Circuit Functional Testing", by *David Palmer-Persen;* August, page 12.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part I", by *Harry P. Bifulco, Jr.;* February, page 43.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part II: The Sampling Converter", by *Harry P. Bifulco, Jr.;* March, page 42.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part III: Which Converter"? by *Harry P. Bifulco, Jr.;* April, page 15.

Calibration and Standardization

"Basic Electrical Laboratory Standards . . . Current Characteristics & Capabilities"; February, page 19.
"Computer-Assisted Standards Laboratory", by *Everleigh W. Foster;* August, page 23.
"Precision Temperature Calibration in the Standards Laboratory", by *Donald Robertson* and *R. H. Verity;* May, page 39.
"A Simplified Approach to Determining the Sensitivity of Resistance Bridges", by *Andrew Gellert;* June, page 25.
"A Transcomparator for High-Q Immittance Measurements", by *David L. Agy* and *Robert E. Nelson;* January, page 37.
"A Transfer Standard for Higher-Accuracy AC Measurement", by *Stephen L. Eschbach* and *Loebe Julie,* July, page 29.

Data Acquisition Systems and Components

"The Automation of Data Acquisition . . . Systems & Transducers", by *Dennis McCoskrie;* August, page 5
"Data Terminals for Instrumentation"; March, page 7.
"Multiplexing Transducer Outputs: Low-Level Multiplexer or Amplifier per Channel"? by *Jack Lum;* June, page 5.
"Storing and Retrieving Measurement Data"; September, page 10.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part I", by *Harry P. Bifulco, Jr.;* February, page 43.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part II: The Sampling Converter", by *Harry P. Bifulco, Jr.;* March, page 42.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part III: Which Converter"? by *Harry P. Bifulco, Jr.;* April, page 15.
"Time Correlation for Instrumentation", by *David M. Biberman;* October, page 8.

Digital Techniques in Measurement Systems

"Automated Test Instrumentation . . . A State-of-the Art Survey", May, page 7.
"Data Terminals for Instrumentation"; March, page 7.
"Digital Computers & Peripherals for Instrumentation— A Directory"; June, page 13.
"A Digitally Controlled Analog Phase Source", by *Don R. Tait;* May, page 47.
"Instrumentation for Test & Design of Digital Computers and Data Systems", by *Theodore C. Gams;* January, page 21.
"Solving the Digital-Machine Interface Problem", by *Frank Kasper, Jr.* and *Philip Schaten;* August, page 20.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part I", by *Harry P. Bifulco, Jr.;* February, page 43.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part II: The Sampling Converter", by *Harry P. Bifulco, Jr.;* March, page 42.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part III: Which Converter?" by *Harry P. Bifulco, Jr.;* April, page 15.

Directories and Surveys of Instruments and System Components

"Automated Test Instrumentation . . . A State-of-the-Art Survey", May, page 7.
"The Automation of Data Acquisition . . . Systems & Transducers", by *Dennis McCoskrie;* August, page 5.
"Basic Electrical Laboratory Standards . . . Current Characteristics & Capabilities"; February, page 19.
"CRO's, Modules, and Accessories—A State-of-the Art Survey"; April, page 6.

"Data Terminals for Instrumentation"; March, page 7.
"Digital Computers & Peripherals for Instrumentation—A Directory"; June, page 13.
"Instrumentation for Test & Design of Digital Computers and Data Systems", by *Theodore C. Gams;* January, page 21.
"Instrumentation Panorama '71", October, page 18.
"Power-Supply Finder . . . 6th Edition"; May, page 19.
"Storing and Retrieving Measurement Data"; September, page 10.
"Who Makes Instruments?", November, page 21.

Journal of the Precision Measurements Association

"Computer-Assisted Standards Laboratory", by *Everleigh W. Foster;* August, page 23.
"Experimental Determination of Black-Body Cavity Directional Emittance", by *Dwayne E. Hinton,* March, page 35.
"Key Transmission Test—Insertion Loss . . . Part I: Measuring Circuits & Techniques", by *G. W. Pentico;* November, page 82.
"Key Transmission Test—Insertion Loss . . . Part II: Practical Instruments & Systems", by *G. W. Pentico;* December, page 20.
"The Metric Study Report: a Summary"; September, page 34.
"Precision Temperature Calibration in the Standards Laboratory", by *Donald Robertson* and *R. H. Verity;* May, page 39.
"Response Characteristics of the Turbine Flometer", by *Edward E. Francisco;* February, page 33.
"A Simplified Approach to Determining the Sensitivity of Resistance Bridges", by *Andrew Gellert;* June, page 25.
"A Transcomparator for High-Q Immittance Measurements", by *David L. Agy* and *Robert E. Nelson;* January, page 37.
"A Transfer Standard for Higher-Accuracy AC Measurement", by *Stephen L. Eschbach* and *Loebe Julie;* July, page 29.
"TV Time Synchronization in the Western U. S.", *F. K. Koide* and *E. J. Vignone;* October, page 26.
"Using a Deviation Bridge to Perform High-Speed, Precision DC Resistance Measurements", by *Peter H. Reynolds* and *Carl R. Scharle;* April, page 28.

Measuring Physical, Mechanical and Other Phenomena

"The Automation of Data Acquisition . . . Systems & Transducers", by *Dennis McCoskrie;* August, page 5.
"Experimental Determination of Black-Body Cavity Directional Emittance", by *Dwayne E. Hinton,* March, page 35.
"Multiplexing Transducer Outputs: Low-Level Multiplexer or Amplifier per Channel?" by *Jack Lum;* June, page 5.
"Precision Temperature Calibration in the Standards Laboratory", by *Donald Robertson* and *R. H. Verity;* May, page 39.
"Response Characteristics of the Turbine Flowmeter", by *Edward E. Francisco;* February, page 33.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part I", by *Harry P. Bifulco, Jr.;* February, page 43.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part II; The Sampling Converter", by *Harry P. Bifulco, Jr.;* March, page 42.
"Synchro/Resolver-to-Digital Conversion for Computer Interface . . . Part III: Which Converter?" by *Harry P. Bifulco, Jr.;* April, page 15.

Miscellaneous

"Computer Evaluation of Transfer Functions", by *B. James Ley;* September, page 24.
"Extraction of Square Roots . . . A Useful Analog Instrumentation Technique", by *Tom Cate;* January, page 7.
"Guide to Applications Literature on Electronic Instrumentation . . . 7th Edition"; April, page 20.
" 'Infinite' Input Impedance—with Gain", by *H. A. Crosby* and *C. A. Rawlings;* September, page 46.
"Instrumentation Opportunity—The Mixed-Up Communications Field Expands", by *Dennis McCoskrie;* December, page 6.
"The Metric Study Report: a Summary"; September, page 34.
"Multiplexing Transducer Outputs: Low-Level Multiplexer or Amplifier per Channel"? by *Jack Lum;* June, page 5.
"Power-Supply Finder . . . 6th Edition"; May, page 19.
"Time Correlation for Instrumentation", by *David M. Biberman;* October, page 8.
"TV Time Synchronization in the Western U. S.", *F. K. Koide* and *E. J. Vignone;* October, page 26.
"Using High-Power Pulse Generators", by *William Milwitt;* September, page 18.

New or Unusual Instrumentation Techniques

"Determining Modulation Index and Modulation Sensitivity", by *W. D. Seal* and *C. F. Rothrock*; June, page 33.
"A Digitally Controlled Analog Phase Source", by *Don R. Tait;* May, page 47.
"Diode Testing with a Spikeless Switch", by *D. E. Bottaro* & *C. D. Root;* December, page 29.
"Disc Recording for Data Analysis", by *John Riner;* February, page 7.
"Guide to Applications Literature on Electronic Instrumentation . . . 7th Edition"; April, page 20.
"Impulse Radiator Sparks EMC Test Programs", by *Albert A. Smith, Jr.;* October, page 16.
" 'Infinite' Input Impedance—with Gain", by *H. A. Crosby* and *C. A. Rawlings;* September, page 46.
"Instrumentation Applications of Videotape Recording", by *James J. Reis;* November, page 9.
"Using High-Power Pulse Generators", by *William Milwitt;* September, page 18.

Observing and Recording Waveforms and Signals

"CRO's, Modules, and Accessories—A State-of-the Art Survey"; April, page 6.
"Diode Testing with a Spikeless Switch", by *D. E. Bottaro* & *C. D. Root;* December, page 29.
"Disc Recording for Data Analysis", by *John Riner;* February, page 7.
"Instrumentation Applications of Videotape Recording", by *James J. Reis;* November, page 9.
"Instrumentation for Test & Design of Digital Computers and Data Systems", by *Theodore C. Gams;* January, page 21.

RF, Microwave, and EMI Measurements

"Determining Modulation Index and Modulation Sensitivity", by *W. D. Seal* and *C. F. Rothrock;* June, page 33.
"Electromagnetic Pollution Measurement," by *H. Dean McKay;* December, page 14.
"Impulse Radiator Sparks EMC Test Programs", by *Albert A. Smith, Jr.;* October, page 16.
"Instrumentation Opportunity—The Mixed-Up Communications Field Expands", by *Dennis McCoskrie;* December, page 6.
"Key Transmission Test—Insertion Loss . . . Part I: Measuring Circuits & Techniques", by *G. W. Pentico;* November, page 82.
"Key Transmission Test—Insertion Loss . . . Part II: Practical Instruments & Systems", by *G. W. Pentico;* December, page 20.
"A Transcomparator for High-Q Immittance Measurements", by *David L. Agy* and *Robert E. Nelson;* January, page 37.
"Using High-Power Pulse Generators", by *William Milwitt;* September, page 18.

Testing Components, Modules, Etc.

"Diode Testing with a Spikeless Switch", by *D. E. Bottaro* & *C. D. Root;* December, page 29.
"Evaluation & Selection of Bench-Top Digital IC Testers", by *Sidney G. Freshour;* July, page 5.
"Key Transmission Test—Insertion Loss . . . Part II: Practical Instruments & Systems", by *G. W. Pentico;* December, page 20.
"Logic Circuit Functional Testing", by *David Palmer-Persen;* August, page 12.
"Using a Deviation Bridge to Perform High-Speed, Precision DC Resistance Measurements", by *Peter H. Reynolds* and *Carl R. Scharle;* April, page 28.
